

## LAR507 Urban Furniture

Faculty of Agriculture – Compulsory course

Credit: 3      ECTS: 7,5

Course Description: Evaluation of spatial, architectural, ecological, and socio-cultural significance of urban furniture in urban spaces. Identifying the role of urban furniture and its dynamics in urban environments, regarding the dimensions and scales of sustainability with the help of assignments and research studies.

Course Outcomes:

- Spatial Impact Analysis: Assess how urban furniture placement influences the spatial dynamics of urban areas.
- Architectural Significance Evaluation: Examine the design elements of urban furniture and its contribution to the aesthetic and functional aspects of urban spaces.
- Socio-cultural Implications Examination: Investigate how urban furniture fosters community engagement and contributes to the cultural identity of urban areas.
- Ecological Sustainability Assessment: Evaluate the environmental impact of urban furniture and promote practices aligning with sustainable urban development.
- Dynamic Relationship Analysis: Explore the adaptable and flexible design of urban furniture to meet evolving urban needs.
- Comprehensive Sustainability Understanding: Demonstrate a holistic grasp of sustainability dimensions in urban furniture, integrating environmental, economic, and social considerations.
