GCC231 Sustainability Development and Education

Common Course – Elective course

Credit: 0   ECTS: 2

Course Description: The course content focuses on integrating sustainable development into education. It aims to enable students to understand the concepts of sustainable development and evaluate them from social, economic, and environmental perspectives. Additionally, students will be encouraged to develop a sense of global responsibility and cooperation to address significant international issues. Throughout the course, students will learn about the Sustainable Development Goals (SDGs) and their impact on society and the world, fostering awareness and the ability to design projects that contribute to a sustainable future. The course will be delivered through various modules and practical applications to enhance students' understanding and involvement.

Course Outcomes:

- Understand the concept of sustainable development and evaluate its importance.
- Identify and comprehend the 17 Sustainable Development Goals (SDGs).
- Recognize environmental, social, and economic challenges that hinder sustainable development.
- Develop sensitivity towards inequalities and injustice and explore solutions.
- Establish the link between sustainability and human rights.
- Analyze the role of global cooperation and partnerships in achieving sustainable development goals.
- Design and implement sustainable development projects that positively impact society and the environment.
- Increase societal awareness of sustainability issues through educational initiatives.
